Amendments to the Claims:

Please replace all prior versions, and listings of claims in the application with the following listing of claims.

Listing of claims

Claim 1 (Currently Amended): A method of storing information from a mobile communications terminal, the method comprising:

determining a storage location from a plurality of storage locations based on predetermined criteria, the plurality of storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network; and

storing the information to said storage location for later retrieval by a user of the mobile communications terminal.

Claim 2 (Canceled)

Claim 3 (Currently Amended): A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network;

storing an order of preference of said storage locations, selected by the user; and
when information is to be stored:

determining a storage location to be used, based on the order of preference selected by the user; and

storing the information at the used storage location for later retrieval by a user of the mobile communications terminal, without informing the user of the identity of the used storage location.

Claim 4 (Currently Amended): A method of storing information from a mobile communications terminal, the method comprising:

Application No.: 09/892,460
Old Attorney's Docket No. 027557-054
New Attorney's Docket No. 0119-077
Page 3

presenting to a user a list of available storage locations, the available storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network;

determining a preferred storage location selected by the user; and

storing the information at a used storage location for later retrieval by a user of the mobile communications terminal, without informing the user of the used storage location.

Claim 5 (Original): A method as claimed in claim 4, comprising:

storing the information at a first preferred storage location selected by the user, if sufficient storage is available there; and

storing the information at a second preferred storage location selected by the user, if insufficient storage is available at the first preferred storage location.

Claim 6 (Currently Amended): A method of storing information from a mobile communications terminal, the method comprising:

selecting a storage location from a list including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network, the selection being made in accordance with predetermined criteria; and

storing the information at the selected storage location for later retrieval by a user of the mobile communications terminal.

Claim 7 (Currently Amended): A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network;

storing the information for later retrieval by a user of the mobile communications terminal at a first preferred storage location selected by the user, if sufficient storage is available there; and

storing the information for later retrieval by a user of the mobile communications terminal at a second preferred storage location selected by the user, if insufficient storage is available at the first preferred storage location.

Claim 8 (Currently Amended): A method of retrieving information to a mobile communications terminal, the method comprising:

presenting to a user a list of available data items, the available data items including at least one data item stored at a storage location in said terminal and at least one data item stored at a storage location accessible over a mobile communications network,

wherein the at least one data item stored at the storage location accessible over the mobile communications network was earlier stored at the storage location accessible over the mobile communications network by means of the mobile communications terminal.

Claim 9 (Original): A method of retrieving information as claimed in claim 8, comprising presenting the list of available data items, without informing the user of their respective storage locations.

Claim 10 (Original): A method of retrieving information as claimed in claim 8, comprising presenting the list of available data items, together with an indication of their respective storage locations.

Claim 11 (Previously Presented): A method of retrieving information as claimed in claim 8, wherein the user can retrieve stored data, without specifying whether the data is stored on the mobile communications device, or on a storage medium connected thereto, or at a remote storage device.

Claim 12 (Previously Presented): A method of retrieving information as claimed in claim 8, wherein the user is presented with a list of stored data items, including items stored by the user, and items stored on a remote storage device, the items stored centrally on the remote storage device being accessible by multiple users.

Claim 13 (Currently Amended): A method of retrieving information to a mobile communications terminal, the method comprising:

Application No.: 09/892,460
Old Attorney's Docket No. 027557-054
New Attorney's Docket No. 0119-077
Page 5

presenting to a user a list of available data items, the available data items including at least one data item stored by the user, and at least one data item stored by a central source and accessible by multiple users,

wherein the at least one data item stored by the user is stored at a storage location accessible over the mobile communications network.

Claim 14 (Original): A method of retrieving information as claimed in claim 13, wherein the list does not indicate the source of the data items.

Claim 15 (Previously Presented): A mobile communications device, adapted to store information in accordance with a method as claimed in claim 1.

Claim 16 (Original): A mobile communications device as claimed in claim 15, in the form of a mobile phone.

Claim 17 (Currently Amended): A mobile communications device, adapted to retrieve information in accordance with a method as claimed in claim [[1]] 8.

Claim 18 (Original): A mobile communications device as claimed in claim 17, in the form of a mobile phone.

Claim 19 (New): A method of storing information as claimed in claim 1, comprising:
maintaining a permanent connection to the mobile communication network when the mobile communications terminal is operational.

Claim 20 (New): A method of retrieving information as claimed in claim 8, comprising:
maintaining a permanent connection to the mobile communication network when the mobile communications terminal is operational.
